## **PROFESSIONAL PROFILE**

---

An enthusiastic Software Developer seeking an exciting development role. I endeavour to always deliver high quality code, enjoy new challenges, am experienced in agile, have developed in **Vue.js**, **HTML5**, **CSS3**, **JQuery**, **JavaScript** and **Bootstrap**. Also developed other frontend applications using PowerBuilder, C++, Java and Perl. Prior to employment I successfully completed a BSc. in Computer Science (honours) degree achieving First Class Honours in the process.

## **EMPLOYMENT HISTORY & WORK EXPERIENCE**

---

### **Aspire Technology: Sandyford, Dublin 18**

**Position: Frontend Developer**  
**Main Responsibilities**

**June 2020 – Present**

- Delivery of high quality, interactive frontend dashboards for both internal and external use. Examples include 'Alarm Analytics Dashboards', 'Health Checks' and 'Energy Saving and Consumption Dashboards'.
- Dashboards were visualisations of large data sets returned from REST API calls.
- Tools were developed within VS Code IDE using the Vue.js framework as well as HTML5, CSS3 and JavaScript and were done in an agile methodology environment.
- Delivery of software was performed using git and deployed either via Docker images or by logging onto internal or external servers (i.e. AWS) via PuTTY.
- Required excellent communication skills while working remotely in a team environment, based in Dublin, Belgrade and Lisbon. Often worked under pressure to deliver dashboards within a short timeframe.

### **Equisoft: Newbridge, Co Kildare**

**Position: Software Developer**  
**Main Responsibilities**

**January 2020 – May 2020**

- Development of high quality code for the Timesheets and Horse Management System, communicating within an agile environment, to deliver software releases on time.
- Developed within PowerBuilder IDE along with Microsoft SQL Server and SourceSafe for version control.

## **Aspire Technology: Sandyford, Dublin 18**

**Position: Frontend Developer**  
**Main Responsibilities**

**February 2019 – September 2019**

- Delivery of high quality, interactive frontend dashboards for both internal and external use. Examples include Voice and Data Quality Visualisations and Site Alarm Trends.
- Tools were developed within eclipse and VS Code IDE's using HTML5, CSS3, jQuery, JavaScript, Bootstrap and Perl and were done in an agile methodology environment.
- Delivery of software was performed using git and deployed either via Docker images or by logging onto internal or external servers (i.e. AWS) via PuTTY.
- Required excellent communication skills working in a team environment, based in Dublin and Belgrade. Often worked under pressure to deliver dashboards within a short timeframe.

**Position: Software Engineer**  
**Main Responsibilities**

**August 2017 – January 2019**

- Responsible for the delivery of high-quality software to Ericsson's RNC platform, communicating within a team in an agile environment, to deliver software releases on time.
- Executing test suites on software deliverables and upgrading / adding test suites if necessary, followed by documenting work undertaken and the impact of the changes.
- Duties included collaborating within a team, gathering requirements, implementation, testing, documenting and the delivery of software at set intervals.

## **Ericsson Ireland: Athlone, Co Westmeath**

**Position: Software Engineer Intern**  
**Main Responsibilities**

**February 2016 – August 2016**

- Development of the BOAT tool, which is a Java, Swing and SQL based tool used by customer support to track customer service requests.
- Gathering requirements, coding, testing, documenting and software delivery at set intervals.
- Good communication skills were required working in a team environment, listening to and understanding the requirements needed by the customer support team. Often worked under pressure on challenging features to meet demanding deadlines.

## **O'Doherty's Audio and Video Productions: Clondalkin, Dublin 22**

**Position: VT Technician**  
**Main Responsibilities**

**September 2006 – August 2013**

- Recording, archiving and selling of horse racing footage onto various types of media formats. Digitally editing footage to create montage clips or add graphics.
- Promoted to head of V.T. Department in 2008 where I developed and implemented new concepts for archiving the major race meetings onto broadcast formats over DVD.

## EDUCATION & QUALIFICATIONS

---

**Institute of Technology Tallaght, Dublin 24**

**2013 – 2017**

**BSc (Honours) in Computing (1.1 - First Class Honours)**

Having successfully completed a 4 year degree, I am competent in the following **I.T. Skills**

- Capable of designing, developing and deploying websites using HTML5, CSS3, JavaScript, Angular JS and Twitter Bootstrap.
- Confident user of Java, C++, C# and SQL and NoSQL databases.
- Design, developing and testing Android applications.

**4<sup>th</sup> Year Project – Android Fuel Logger Application**

**2016 – 2017**

- A fuel and maintenance cost tracker application for Android phones built using Java, XML, NoSQL, JavaScript and numerous web API's.

## INTERESTS & ACHIEVEMENTS

---

I have a keen interest in many sports, music and programming.
